

Data Scientist Intern

(Full-Time opportunity available)

Job Description

eMoldino is an enterprise-level supply chain management (SCM) solutions provider that specializes in cultivating digital transformation for Fortune 500 partners and major manufacturing organizations worldwide. By utilizing cutting-edge technologies, such as AI and machine learning, eMoldino delivers data-driven business intelligence to lead the industry 4.0. movement.

We are currently undergoing an aggressive expansion in the most cutting-edge sector of solution delivery. As a member of our organization, you will gain firsthand experience collaborating with Fortune 500 corporate clients. Traveling and consulting business partners in the US, EU, and Asia are essential parts of the work. If one likes to travel, it would be an added benefit.

Our mission is to help global manufacturers rethink supply chain management, driving true corporate innovation and bringing customer experience into the cycle.

eMoldino is looking for a full-time Data Scientist Intern to help process advanced analytics on our platform. You will work closely with the AI/ML Team and across functional teams to accomplish diverse business objectives. The ideal candidate will have working knowledge of statistics, mathematics, and data science programming languages (e.g., SQL, R, Python).

Your primary focus will be to process and develop algorithm models to drive business value for our users. We are looking for someone who can come in and make an impact through hands-on learning experience as part of the AI/ML Team, working with our experienced software engineers.

Responsibilities

Below are some of the responsibilities a Data Scientist Intern is expected to assume in their positions:

- Selecting features, building and optimizing classifiers using machine learning techniques
- Build predictive models and machine learning algorithms
- Enhancing data collection procedures to include information that is relevant for building analytic systems
- Processing, cleaning, and verifying the integrity of data used for analysis
- Analyze existing data to develop metrics and trends to enhance knowledge and capture value of data
- Present information using data visualization technique
- Propose solutions and strategies to business challenges
- Collaborate with engineering and product development teams

Qualifications

- BS/BA in Data Science, Statistics, Computer Science, or equivalent relevant experience
- 2+ years of programming language such as SQL, Python, or R
- Proficiency with data mining, mathematics, and statistical analysis
- Advanced pattern recognition and predictive modeling experience
- Strong communication skills to explain complex ideas in a way that is easy to understand
- High proficiency in Korean/English language

Working Conditions

- Duration: 3 Months (A full-time position will be offered to qualified candidates after the internship period)
- Workplace: 15F Seoul Square, 416, Hangang-daero, Jung-gu, Seoul
- Working hours: 09:00~18:00 (5 days)
- Compensation: Competitive Pay

Guidelines for Applicants
